Figure 19

A cross-sectional view of a multi-layered structure 500. The structure consists of several horizontal layers. The top layer is labeled 510. Below it is a layer 520 containing a central rectangular region with horizontal hatching, labeled 532. This central region is flanked by two vertical regions, each containing a series of 'X' marks, labeled 534 and 536. The bottom layer is labeled 540. The entire structure is bounded by a top surface 500 and a bottom surface 530.

A cross-sectional view of a device assembly 500. The assembly includes a central component 530 with a textured, possibly porous, surface. This component is flanked by two layers: a top layer 510 and a bottom layer 520. A layer 532 is positioned to the left of the central component 530. A layer 542 is positioned to the right of the central component 530. A layer 544 is positioned below the central component 530. A layer 536 is positioned to the right of the central component 530. The entire assembly is shown within a frame.
